COMMUNITY RO SYSTEMS

VECTAPURE™ RSX

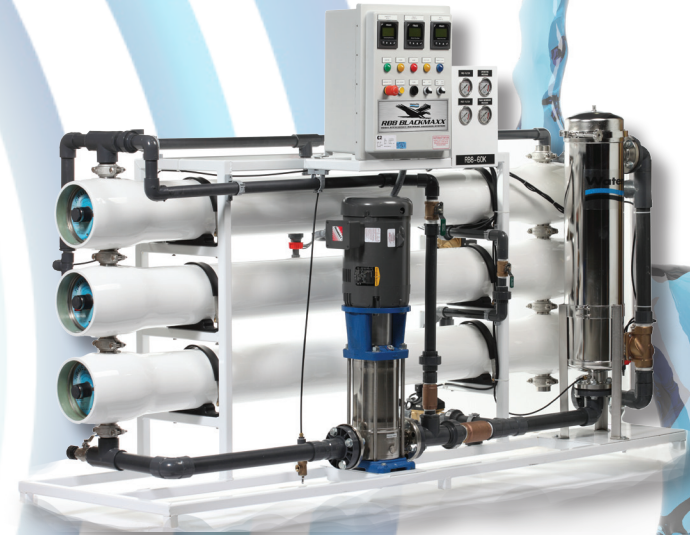

350-1,600 GPD

VECTAMAXX™ RSL

2,400-9,600 GPD

RBB BLACKMAXX®

20,000-124,000 GPD

Designed with our own **XFLOW** membrane technology, the Waterite Commercial RO Systems combine ultra-low operating pressures with high, balanced membrane element crossflows; achieving low system maintenance, high efficiency and big energy savings. All systems feature quality Waterite **BLACKMAXX®** RO elements.

VECTAPURE RSX™ systems include as standard features stainless membrane housings, heavy duty rotary vein pumps, 20" poly pre-filter housings.

VECTAMAXX RSL™ systems include as standard features stainless membrane housings, stainless drive pumps, 20" BB poly pre-filter housings, rigid plumbing, oil filled gauges, acrylic flow meters.

RBB BLACKMAXX® systems include as standard features stainless drive pumps, stainless Jumbo pre-filter housings, FRP membrane housings, auto flush, Digital flow and TDS monitors, integrated digital system controller, CIP-ready, can be equipped with factory-programmed PLC's - everything to assure simplicity, dependability and rugged performance.
