

# Cost effective and advanced chemical-free residential water treatment systems from Waterite

## ozonair™

Reliable and effortless to operate, Ozonair™ fully-automatic residential water treatment systems use the natural power of ozone to produce fresh, clear drinking water without harsh, toxic and expensive chemicals. It is the modern answer for control of hydrogen sulfide, iron staining or iron and sulphur-reducing bacteria. Each system includes a cartridge air dryer to control moisture, even in humid climates.

Choose an ozone-enhanced catalytic carbon filter for odors, taste and hydrogen sulfide control or a Birm™ filter for iron staining problems. Where hard, scaling water presents a problem, an Ozonair™ softener will provide silky soft water, free of iron, scale and odors while keeping the media bed fresh and sanitized with natural ozone.

### Waterite's Environmental Commitment

Waterite's symbol will now be displayed with all Waterite products that use recycled material, are environmentally neutral or reduce emissions or waste beyond industry norms.
